

REISSUE APPLICATION DECLARATION BY THE INVENTOR

Docket Number (Optional)

10970214-2

I hereby declare that:

Each inventor's residence, mailing address and citizenship are stated below next to their name.

I believe the inventors named below to be the original and first inventor(s) of the subject matter which is described and claimed in patent number 6,009,214, granted December 28, 1999 and for which a reissue patent is sought on the invention entitled Multi-Resolution Color Contact-Type Image Sensing Apparatus

the specification of which

☐ is attached hereto.☒ was filed on 11/27/2001 as reissue application number 09/996,967

and as amended on July 9, 2003, and in accordance with the amendment submitted herewith.
(If applicable)

I have reviewed and understand the contents of the above-identified specification, including the claims, as amended by any amendment referred to above.

I acknowledge the duty to disclose information which is material to patentability as defined in 37 CFR 1.56.

☐ I hereby claim foreign priority benefits under 35 U.S.C. 119(a)-(d) or (f), or 365(b). Attached is form PTO/SB/02B (or equivalent) listing the foreign applications.

I verily believe the original patent to be wholly or partly inoperative or invalid, for the reasons described below. (Check all boxes that apply.)

☐ by reason of a defective specification or drawing.☒ by reason of the patentee claiming more or less than he had the right to claim in the patent.☒ by reason of other errors.

At least one error upon which reissue is based is described below. If the reissue is a broadening reissue, such must be stated with an explanation as to the nature of the broadening:

1. Steps (b) and (c) of claim 20 of US 6,009,214 read identically as "when in step (a) the first resolution is selected, scanning the original image at the first resolution". Step (c) should have been corrected to be distinguished over step (b) and read as "when in step (a) the **second** resolution is selected, scanning the original image at the **second** resolution. (Boldface added by applicant.)

2. During further review of the Application, the Applicant noted other species of claims such as recited in new claim 125, which includes a plurality of first photosensor segments and a plurality of second photosensor segments "such that the sum of the first length and the second length corresponds to a first maximum image size when sensed with the first resolution, and such that the second length corresponds to a second maximum image size when sensed with the second resolution". These limitations reflect an important invention previously unclaimed by the Applicant.
